

## Ultraportable Gas Analyzers

### Description

We now offer the new ground-breaking, “Ultraportable” line of analyzers designed for environmental and industrial applications that features :

- User-cleanable optics
- Remote controllable via the internet
- All gases reported on a dry and wet mole fraction basis
- Only 15 kg
- Power: 60 watts (either AC or DC)
- Extended range option (on selected analyzers)
- Species specific measurements

### Applications Include

- Field studies
- Soil flux
- Eddy accumulation
- Compliance monitoring
- Leak detection (natural gas leak)
- Air quality studies
- Other applications requiring multi-gas measurements

### Products Covered

- Trace Gas Analyzer
- Isotope Analyzer
- Questioned Document
