

Detectable - Warning Tape

Description

We supply printed caution tapes for magnetic detection and identification of underground utility service lines. The width of tape used is determined by the size and depth of the underground utility line.

Packaging Properties

- Rolls available in different width, thickness, color and text, as per customers specifications
- Excellent tensile strength and elongation
- Excellent impact strength
- High stress cracking resistance for longer shelf and service life

Applications

- Water
- Sewage
- Drainage pipes
