

# DI Saddles

## Description

- HDPE Saddles suitable for PE, UPVC, DI, Steel & AC pipes.
- Sizes available for DN 32 to DN 300
- Universal design: rationalizes the saddle's global structure, optimizes the tightening mechanical resistance and Guarantees a perfect adhesion of the saddle's contact areas on the pipe.
- Tightness guarantee between main pipe and tapping saddle ensured by boss integrated And centered gasket.
- Full flow tapping is ensured without metallic liner thanks to the gasket's peculiar shape.
- Secured setting thanks to contact crossbars that balance tightening stresses on all the strap's width.
- Easy installation with two screws and one wrench only
- Corrosion preventive epoxy coating.
