

Ore Loc

Description

GRT Ore-Loc is a robust, liquid polymer that provides an exceptional surface coating solution on all ore and material surface types. Designed specifically for the tough conditions of the resources sector, [GRT Ore-Loc](#) can be applied directly to raw materials using existing or specially designed spray-bar systems or simply by conventional water cart.

Incorporated with water, GRT Ore-Loc locks fine particles together, encapsulating and demobilizing fugitive dust. Importantly, the [agriculture land, resource & site management](#) solution does not alter the burning properties coal or quality of your products, by targeting and mitigating only dust.

Easy Application, through existing or bespoke systems
Flexible Protection across wet, dry and extreme climates
Cost benefits from reducing wind-borne material loss
non-toxic, has a low carbon footprint and reduces the damage caused by fugitive dust.

Features:

- Non Hazardous
- Simple & Easy to Apply
- Non Flammable & Non volatile
- Water Resistant
- Non Leeching
- Biodegradable
- Non Dissipating
- Dries Completely odorless
- Ultraviolet Resistant
- Environmentally Safe

Area Of Use:

- Materials stockpiles
- Safety Management
- Conveyor systems and rail cars
- Environmental Management

Benefits:

- Easy Application, through existing or bespoke systems
- Flexible Protection across wet, dry and extreme climates
- Cost benefits from reducing wind-borne material loss
- non-toxic, has a low carbon footprint and reduces the damage caused by fugitive dust.
