

# Enviro binder

## Description

GRT Enviro Binder is an [erosion control product](#) penetrates into and binds with soil and forms a complex interconnected structure with the loose granular surface particles. After the polymer dries, a durable surface, waterproof layer is formed that binds the surface and prevents erosion.

Non-toxic and environmentally friendly, GRT: Enviro-Binder can be applied in the most environmentally sensitive areas where very low to nil impacts to environmental values are guaranteed for up to 12 months. GRT: Enviro Binder has been independently tested and extensively used across a large number of [dust & water management](#) projects in a diverse range of environments.

## Benefits:

- Non toxic and environmentally friendly product
- Immediately effective once applied
- Minimal soil preparation for application of product
- Safe installation
- Waterproof product
- Ultimate product to solve erosion and sediment issues

## Features:

- Non Hazardous
- Simple & Easy to Apply
- Non Flammable & Non volatile
- Water Resistant
- Non Leeching
- Biodegradable
- Non Dissipating
- Dries Completely odorless
- Ultraviolet Resistant
- Environmentally Safe
