

ELI Flex Paste

Description

Eli-Flex is a two-part polyurethane resin, formulated to effect quick and easy repairs to damaged conveyor belting and other rubber components.

The product Eli-Flex has enjoyed rapid growth across a wide range of industries.

- Quick setting
- Easy to use twinpack mixing & application system
- Excellent flexibility
- High tear & impact-resistance
- Good wear & abrasion-resistance
- Broad spectrum chemical protection
- Flame retardant
- Low irritation potential
- No special tools or skills required
- Environmentally friendly handling properties

Conveyor Belt Applications

Eli-Flex can be used on all types of rubber and PVC belts. This includes fabric carcass, steel cable and steel cored belts. Eli-Flex is suitable for repairing holes, tears, splits, rips, gouges, missing filler strips, worn patches, clip joint / fastener sealing, edge repairs, re-building cleats, chevrons and sidewalls, worn drum lagging, roller coatings and friction linings.

Other Uses Include

Industrial tyre repair, vehicle anti-roll bar repair, general rubber rebuilding, rubber castings, rubber repair, mouldings, cable-entry sealing, marine fender repair, floating hose repair, watertight insulation, expansion joints, anti-vibration pads etc.
