

NIVEL 210_220 – Inclination Sensor

Description

The Nivel210/Nivel220 precision inclination sensor for simultaneous measurement of inclination, direction of inclination and temperature based on an optoelectronic concept.

Features

- For large structure monitoring and engineering constructions such as dams, bridges and high-rise buildings.
- The Nivel210 sensor is equipped with an RS232 interface to connect the sensor directly
- The Nivel220 sensor is equipped with an RS485 interface to use with a bus system
- Where high precision information about the inclination and the direction of movements is needed
