

SPRINTER 150 – Digital Levels

Description

The Sprinter 150 covers almost all construction applications. It automatically determines your delta height. Enter your benchmark, measure the backsight B, measure the foresight F and the result will be displayed instantly. For continuous measurement choose the tracking mode and averaging mode for more accurate results.

Features

- User-friendly menu
- Automatic height calculation and delta height
- Variety of levelling applications
- Built-in memory (only 150M)
