

Two Speed Motors

Description

Two speed motors offers both a separate winding and changes the wiring to a specially designed wiring for the purpose of variable speed in order to control the requested speed.

Features

- ✓ Reliable insulation system
- ✓ Superior operational features
- ✓ Highly-efficient and low-power start-up
- ✓ Superior motor control and excellent compatibility with protective equipments
- ✓ Cooling characteristics suitable for pole change

Applications

- ✓ Pumps
- ✓ Fans
- ✓ Crushers
- ✓ Conveyor belts
- ✓ Mills
- ✓ Centrifugal machines
- ✓ Presses
- ✓ Elevators
- ✓ Packaging equipment
- ✓ Grinders and others

Scope of Production

Range	Speed	Frequency
0.4kW ~ 1,500kW	<ul style="list-style-type: none"> •Constant Torque •Constant Horsepower •Variable Torque 	50 to 60 Hz
