

Automated Colony Counters

Description

These are high resolution automatic color colony counter with automatic lighting. Widely used in food microbiology, it counts colonies and automatically saves all data to Excel. Equipped with a camera and a software, it connects to a PC via an USB connection.

Features

- High Resolution & Performance
- Software Efficiency
- Inhibition Zone, Agar Well
- Full Traceability
- Excellent Reproducibility And Repeatability

Products Covered

- Manual Colony Counter
- Scanner For Bioassay
