

Breeching Inlets

Description

Breeching inlets are used in buildings for firefighting purposes, fitted with inlet connection at Civil Defence access level and outlet connection at specified points, which is normally dry but capable of being charged with water by pumping from fire service appliances. The 2-way breeching inlets has 2 x 2½" Instantaneous male non return valve inlets and a 4" outlet. The 4-way inlet breeching has 4 x 2½" Instantaneous male non return valve inlets and a 6" outlet along with 1" drain valve.
