

Sprinkler Flexible Hose & Fittings – Braided Type & Unbraided Type

Description

Sprinkler Flexible Hose & Fittings is designed to improve the conventional piping works and allow free adjustment to any detailed dimension. It is also economical since it reduces the time required in installation and that in fine finishes. Flexible tubes are polished, making it highly resistant to corrosion.

SP-Joint Specification

Braided Type	<p>Flexible part is covered with braid for better pressure resistance, tensile strength and tube surface protection.</p> <ul style="list-style-type: none"> •Pipe external diameter Ø25,Ø28 2 types (BSS, BSSN, BASN)
Unbraided Type	<p>Most economical product with flexible part exposed.</p> <ul style="list-style-type: none"> •Pipe external diameter Ø25,Ø28 2 types(USSI, USS, USSN, UASN)
