

Compression Fittings

Description

We offer a full range of compression fittings for direct connection to polyethylene pipes and our compression fittings meet the requirements of BS 5114 standards.

Main Features

- ✓ Compression fittings shall be made from Gunmetal to BS 1400-LG2. The fittings shall be suitable for direct connection to polyethylene pipes and the inserts shall be of copper and male / female fittings shall be chamfered to suit assembling and to avoid crossing of threads. The compression fittings shall be resistant to pull out.
- ✓ Compression Fitting Adaptors mainly used to connect between BSP male iron or female iron threaded parts and a compression fitting to MDPE or LDPE pipe.
- ✓ Compression Fitting Straight Connectors mainly used to connect between compression fittings for MDPE or LDPE pipe.
