

Crimelite

Description

With the Crimelite range of forensic light sources we have pioneered the use of high intensity LED illumination for the search, detection and examination of forensic evidence both at the crime scene and in the forensic laboratory.

Crimelites provide a quality of construction that is instantly recognizable in look, feel and performance. All Crimelites within the range include the unique guarantee of being able to provide 100% light output throughout the lifespan of a battery ensuring that no trace of evidence goes unmissed.
