

# Dante Amplifier

## Description

Dante is the most popular networked audio transport in the industry, supported by more than 250 manufacturers.

## Features

- Real flexibility in channel power allocation without compromise
- True 'open interoperability' – integrate with any matrix or DSP platform.
- Available with Lake Processing with Dante and 3rd-party control and critical monitoring, or fully integrated onboard DSP and AVB connectivity
- Redundant audio inputs and onboard system surveillance for compliance in mission-critical Voice Alarm applications (PA/VA)
- Lower installation costs by virtue of better mains management, avoiding over-specification of installed mains distribution, cooling and UPS (where required).
- Unique Rational Power Management™ (RPM) technology
- Regulated Switch-Mode Power Supply
- Breaker Emulation Limiter (BEL) to prevent power interruption
- Under-voltage Limiting (UVL) for continued operation despite severe voltage drops
- Best-in-class Power Factor Correction (PFC)
- Detachable phoenix plug-in audio connectors
- Unique spec and commission tools (CAFE and ESP) makes project design, tender, planning and implementation easier than ever

## Application

- Compact, Powerful And Cost-effective Solution For Theatre
- Dutco Delivers Future Proof Flexibility
- Dutco Drive Significant Cost Savings And Audio Clarity For University & Church.

## Product Type

- DANTE POWER AMPLIFIER
