

Dismantling joint

Description

Dismantling Joints are a double flanged composite fitting featuring a telescopic action between a flanged spigot and flange adaptor. The joint is designed to provide longitudinal adjustment in flanged pipe systems.

The Dismantling Joints provide a simple method for the installation and removal of flanged valves, pumps, flow meters, flanged pipes and pipe fittings.

Sizes: 50 – 2000NB

Working Pressure: 10/16/25/40/80 Bar

Higher sizes & Pressure ratings on request

Features

- ✓ Full bore.
- ✓ Complete water tightness.
- ✓ According to ISO, UNE, DIN, NF, BS and AWWA standards.
- ✓ Fully corrosion resistant construction
- ✓ Non Toxic Blue fusion bonded epoxy coating

Material of Construction

- ✓ Ductile Iron
- ✓ Carbon Steel
- ✓ Stainless Steel
