

## Energy Dispersive Spectrometer, EDS with SEM

### Description

#### EDS System

The Element Energy Dispersive Spectrometer (EDS) System delivers powerful analytical capability in a compact package, maximizing performance and flexibility, while providing streamlined operation to guarantee fast results and ease of use. It is focused on the industrial market, where application specific problems need to be solved quickly and accurately. The combination of an Element Silicon Drift Detector (SDD) with the user friendly APEX™ software provides a complete EDS microanalysis solution for all levels of analysis and high throughput industrial applications.

### Products Covered

- ✓ Wavelength Dispersive Spectroscopy, WDS with SEM
- ✓ EDS Tablet Top
- ✓ EBSD Electron Backscatter Diffraction with SEM
