

Flange Adaptors

Description

Flange Adaptors are designed to join pipes of various outside diameters with flanged equipment of various drilling tables. Because of the wide range of tolerance on OD, a Flange adapter can connect steel, ductile iron, cast iron, UPVC, asbestos cement and other rigid pipe materials.

Moulded, circumferentially ribbed or specially profiled gaskets, generally in EPDM or NBR materials, provide for smooth installation by minimizing contact friction. Flange Adapter gaskets are designed to provide a leak tight seal across the O.D range per nominal size and still allow for thermal expansion and contraction of the pipe upto 5mm per gasket, facilitated through gasket deformation.

Sizes : 50 – 2000NB

Working Pressure : 10/16/25 Bar*

Features

- ✓ Full bore.
- ✓ Complete water tightness.
- ✓ According to ISO, UNE, DIN, NF, BS and AWWA standards.
- ✓ Fully corrosion resistant construction
- ✓ Non Toxic Blue fusion bonded epoxy coating
