

## Heavy duty Grinder/polisher

### Description

Grinder and Polishers are designed for demanding production lab environments. Simplicity is balanced with versatility to accommodate many applications. All Manual Grinders & Polishers have durable construction for reliability in high use environments, unique quick cleaning features, and plenty of enhancements for user friendly operation.

### Features

- Quick release lift lock chuck provides rapid connection and removal of specimen holders.
- Unique D-style bowl design provides ample hand room for easy access to the bowl area between steps.
- This high level of loyalty from labs around the world confirms its reputation for solid construction and smart design.
- Thick heavy duty cast aluminum base provides durability for long life. Vibrations are minimized improving grinding and polishing results.
- Belt driven platen design and variable speed cooling fan provide years of trouble free use and whisper quiet operation.
