

## Hot Mounting

### Description

The Hot Mounting Press is designed for 24/7 Use. Eliminate bottlenecks at the mounting stage, rapidly transforming your cut samples to specimens ready for grinding and polishing.

### Features

- High reliability in 24/7 use environments.
- **Optimize Productivity in your space :** Hot Mounting cycles into limited bench space, optimizing productivity. By replacing older, slower, larger presses; capacity can be doubled for the same amount of space.
- **Ease of use saves time and protects sample quality :** Simple user interface eliminates errors and protects the quality of your sample prep. Everything you need is right on the front panel.
- **Comfortable to use :** The single handed closure mechanism engages quickly, moving you right into your next task.
