

# Incinerator for Oil & Gas and Marine Waste

## Description

Oil and Gas drilling, whether it is on-shore or off-shore produces waste gas, hydrocarbon condensate and other hazardous areas, usually Zone 2. Skid mounted incineration systems, which can be moved from one location to another with flame proof equipment can be used for these wastes successfully.

Also, in some cases, due to the highly corrosive marine conditions, painting needs to follow the highest standards set by organizations like NORSOK, NACE & SSPC.

Incinerators that have been used in Oil & Gas Industry are :

- LRD – All Purpose Type
- PDR – Controlled Air Incinerator
- KYR – Rotary Klin
- SRD – Skid Mounted Incinerator
- OXR – Thermal Oxidiser
