

Incubators

Description

Laboratory incubators are used for incubating samples in stable temperature conditions – regardless of the ambient temperature (the maximum range to 100°C).

Types of Incubators available :

- With natural air convection
- With forced air convection

Application

- Incubation of samples for microbiological determinations
- Analysis of thermal resistance of samples subjected to higher temperatures
- Antibodies tests
- Bacteria tests
- Crystallization observations
- Cultivation of thermophilic microorganisms
- Pharma stability tests
- Food industry denaturalizing tests

Products Covered

- Ovens
