

Indoor Digital Clocks – Economy Series

Description

The ECO-DC series are digital clocks in 7-segment LED technique at an economical price, designed in an elegant and slim case, for time, date, or alternating time/date display.

Features

- Autonomous operation with internal quartz, powered from mains
- NTP multicast or unicast synchronization powered over PoE (compatible IEEE 802.3af) or mains powered
- Slave clock operation controlled by self-setting MOBALine code or by IRIG-B, mains powered
- LED display in red or green
- Single- or double-sided clock
- Plastic case in black color
- Ceiling suspension or wall bracket mounting for single- or double-sided clocks
- Intended to be used indoors
