

Laboratory & Industrial Furnaces

Description

Laboratory furnaces are ideal for heat treating, reacting studies, sintering processes, and ceramic firing. The robust construction and high quality elements provide rapid heating rates and a long reliable working life.

Our industrial furnaces are supplied with a wide range of options in order to closely meet customer needs. Designed and built to be extremely hard-wearing, safe, and easy to service, they are available in various sizes, from compact bench mounted models through to large floor standing models with heating chambers.
