

Needle Valves

Description

A needle valve is a type of valve having a small port and a threaded, needle-shaped plunger. It allows precise regulation of flow, although it is generally only capable of relatively low flow rates.

Construction

- ✓ Size : 1/4" to 2"
- ✓ Rating : ANSI / DIN /JIS
- ✓ OS & Y type, Rising Handwheel
- ✓ Union/ Screwed/Bolted Bonnet
- ✓ Straight Pattern
- ✓ Design Std : As per Applicable code
- ✓ Face to Face as per EN 558 series
- ✓ End Connection : Screwed/ Socket Weld Ends
- ✓ Hand Wheel
- ✓ Material : Carbon Steel / Stainless steel / Bronze / Brass
