

Metal Expansion Joint

Description

We offer metal circular expansion joints from 15 mm up to 8 meters in diameter and rectangular expansion joints without dimensional limits. For Non-Metallic Expansion Joints we provide our customers with the highest quality Standard Moulded and Full Face Rubber Flange expansion joints.

Advantages

- ✓ Minimum space required for installation
- ✓ Absorption of movements in multiple directions due to their inherent flexibility
- ✓ They require no maintenance
- ✓ They reduce load and temperature loss to a minimum
