

## Needle Control Valve

### Description

- **DN** 100 – 2000
- **PN** 10 – 25
- **Body** : EN-JS 1050
- **Coating** : Epoxy, Epoxy-Polymer-Ceramic
- Innovative valves for secure regulation of pressure stages and flow rates.

### Features

- ✓ Designed as one piece
- ✓ Optimized flow behavior and minimum head losses when fully open
- ✓ Regulation range up to 96% through linkage actuator with matched characteristic
- ✓ Curve
- ✓ Regulating inserts for all areas of application: blade ring, slotted cylinder, pipe cylinder and other special inserts
- ✓ Broad main seal in cavitation-free zone, additional shaft sealing
- ✓ Four armoured guides and optimum protection against corrosion
