

Nozzle Non Return Valves

Description

- **DN** 80 – 600
- **PN** 10 – 40
- **Body** : EN-JS1025, EN-JS1030
- **Coating** : Epoxy, Enamel
- Due to the design, universally usable and particularly effective non-return valves for raw and potable water as well as cleaned sewage.

Features

- ✓ Minimum pressure loss through optimized flow cross-sections
- ✓ Flow-optimized valve disc and valve sealing ring
- ✓ Optimum hydraulics with short closing path to minimize water surge
- ✓ Wide area of application due to compact form, any possible assembly position and adjustable spring strength
