

Outdoor Digital Clocks

Description

This multifunctional digital clock is designed for outdoor use. With its versatile combinations in height and number of digits, the clock meets most requirements for conventional applications. The 7-segment technique with LEDs of high luminance assures excellent visibility from up to 200m from different angles, even when exposed to direct sunlight.

Features

- Available in red and green
- Aluminum housing, powder-coated in light gray RAL 7040
- Wall mounting, ceiling suspension, or wall bracket mouning.

Functions

- External sensors for temperature display
- Auxiliary interface for RS 232, RS 485, and IRIG-B
- Built-in Ethernet LAN interface
- External buttons for stopwatch
- Infrared remote control for easy access to all functions, for configuration as well as for the stopwatch function
