

## Evaporation Solutions – Parallel Evaporator

### Description

The Parallel Evaporator offers efficient, gentle, and environment friendly parallel concentration. With its clever design cross-contamination can be inhibited and recoveries are maximized. Profit from the wide range of complementary products to tailor your sample workup to your needs.

### Benefits

- **Efficient :** Improve your sample throughput by concentrating samples to a residual volume, No need of nitrogen saves operational cost, Small foot print saves expensive lab space.
- **High quality results :** Eliminate the risk of cross contamination due to a clever design, Integrated solid phase extraction (SPE) eliminates contamination risks, High recovery rates due to smooth sample processing
- **Time savings :** Save time by using the fast and proven parallel Vortex evaporation technology, Increase productivity by fast concentration samples in parallel

### Application

- Parallel Evaporation Food / Beverage
- Parallel Evaporation Environmental Analysis
- Parallel Evaporation Feed
- Parallel Evaporation Pharmaceutical
- Parallel Evaporation Chemical
- Parallel Evaporation Academia / Education
