

Piping Sleeves

Description

Anti-corrosion sleeves for ductile iron piping, for water sewerage and other fluids. Available in blue or black color with a standard thickness of 250 microns.

Application

- ✓ Water sewage
- ✓ Construction industry

Properties

- ✓ Made of prime grade PE material with high softening temperature and dimensional stability
- ✓ Corrosion resistance towards sulphates, chlorides of ground water and subsoil
- ✓ Excellent tensile, impact and tear strength
- ✓ High stress cracking resistance for increased shelf life
- ✓ Easy to open and to apply onto pipes
