

## Planar Grinder

### Description

The Planar grinding machine with a high torque, continuous duty, 5.7Hp motor has an aggressive material removal rate normally seen in much larger, more expensive floor model machines. Convenience features such as an integrated auto wheel dressing and built in cooling make it easy to get consistent results.

### Features

- Fast and efficient grinding with high flatness and maximum edge retention.
- Creates a high-quality, plane surface to move directly to polishing steps with ease.
- Designed for convenience with a self calibrating auto-dressing system and easy stone change.
- All of these benefits in a compact bench top design.
