

Plant Safety

DESCRIPTION

Teaching courseware and equipments to understand Plants working safety.

Courses that cover below topics :

- ✓ Personal Protective Equipment (PPE)
- ✓ Worksite Safety
- ✓ First Aid
- ✓ Fire Prevention
- ✓ Lockout/Tagout
- ✓ Confined Space Safety
- ✓ Electrical Safety
- ✓ Rigging Safety
- ✓ Fall Protection
- ✓ Hazardous Materials Safety
- ✓ Hazard Communications
- ✓ Globally Harmonized System of Chemical Classification and Labelling (GHS)
- ✓ Behavior Based Safety Training
- ✓ Ergonomics
- ✓ Environmental Awareness
- ✓ Industrial Mathematics
- ✓ Industrial Sciences

ENVIRONMENT AWARENESS

Environmental Awareness lesson help you identify ways your awareness can reduce the environment impact of various processes and tasks.

In addition, you will be able describe the process of designing and implementing an environmental management system (EMS) and discuss the overall goals of waste minimization and pollution prevention programs.

STORMWATER REGULATIONS AND POLLUTION PREVENTION PLANS

Such lessons helps you describe ways that storm water runoff can impact the environment. In addition, you will be able to discuss storm water regulations and explain how to effectively develop a storm water pollution prevention plan (SWPPP).

SPILL PREVENTION CONTROL AND COUNTERMEASURES

These lessons helps you describe the use of spill prevention control and countermeasures plans. In addition, you'll be able to discuss common practices for preventing, responding to, and reporting spills.
