Sitrack One – Mobile Sensor Platforms

Description

SiTrack : One ensures complete coverage of the entire rail infrastructure surface without the need to receive GNSS signals for position information. With a one-of-a-kind mounting design, this total solution for rail maintenance and refurbishment produces synchronised engineering, survey-grade 3D point clouds for accurate as-built drawings. A full day's work of surveying can easily be accomplished with re-chargeable, hot-swappable batteries.

Features

- Improved safety for measuring by quickly getting on and off the tracks
- Increased productivity with easy reality capture software
- Simple and easy handling of large amounts of data
- More convenience to work above or below ground
