

Steel Expansion Joint Profiles

Description

Steel Expansion Joint Profiles features static and resistance calculations and resist to pressure and friction. Existing in different standard product range such as “ Heavy duty profiles ” for truck and/or forklift crossing areas , “ watertight profiles” for the areas with water leakage risk and “ seismic profiles” with high movement capability for earthquake zones, these products are highly demanded in the global market.

You have the option to choose from our varied profile seals available in different colors and sizes. All profiles have corner types and most of them have floor & wall twain.
