

Tablet Punch Press

Description

The Single Rotary Tablet Press RSP is a first generation rotary press, GMP model, ideally suited for small and medium batch production.

“RSP” single rotary press has a totally paint free production zone. Having considered the importance of GMP, the production zone is constructed completely of stainless steel or it is plated. This avoids any corrosion due to oxidation and ensures easy cleanability. Turret is made of a special grade of casting with two-piece design of high tensile strength to ensure maximum life and less wear and tear.

The electric control panel is provided with “ON”, “OFF” Push Button, Emergency “OFF” button and Miniature Circuit Breaker as a safety feature.

Model: RSP 16 & 20

Salient Features

- ✓ ELNP Turret (without lower punch seal) and Upper cam tracks
