

Thermal Cycler

Description

Dutco Tennant has completely upgraded their established thermal cyclers to become the most feature rich range of instruments in the market. The Prime range of thermal cyclers provide an unrivalled user experience because each unit, from the personal 3Prime right up to the full size PrimeG instrument feature a full colour touchscreen and intuitive user interface.

The Prime range of thermal cyclers are also designed to provide easy programming. Pre-installed templates allow the user to quickly create even the most complicated programmes via the intuitive touch interface. All thermal cyclers have the ability to transfer programmes between instruments via USB or to your PC. The internal memory can hold 1000 programmes with unlimited storage available on USB data stick.

Our range of thermal cyclers are among the most reliable thermal cyclers in the market.
