Transparent Caching

Description

Transparent cache provides caching service between connected device and content server, and reduces CAPEX/OPEX over mid-mile network link for network operator. It also guarantees QoE for last-mile users by transparent delivery of content.It keeps existing business operation logic of content provider by delivering web/video content transparently at application side.

Well suited for effectively delivering video contents in transparent way and it also dfoptimized for delivering small objects such as web contents, Transparent Cache operates as network backbone/edge cache for ISP/Telco, gateway(IX link) cache for ISP/Telco. And it works as a cache that can internetwork with DPI(Deep Packet Inspection) products.

Transparent cache comes in a various kind of appliances according to the processing capacity. It can be also provided in the form of software package with recommended H/W specification

Key Features

- Fully Transparent Caching
- Cover the small web objects & large video contents at the same time.
